

The Berry Barstool

Standard Seat

The Berry Barstool is both simple and sophisticated: a union of seeming opposites that are fundamental to our furniture design and construction. The lines of the scooped seat are pleasing and its contour comfortable. Tenons on the legs pass through the seat and are wedged, catching the eye and testifying to strength. The "faired" joinery of footrest to leg is a compelling display of workmanship.

The footrests are at two different heights to accommodate children, guitar players, and those who move and stretch.

Smaller Seat

If you are considering a set, we will send a barstool to you, at our expense, for a trial.

Options

- You may choose the wood or combinations of woods.
- You may specify the height of the seat from 18" to 31."
(These are common: for a table, 18" seat height; for a counter, 24"; for a bar, 30".)
- You may choose our standard seat, 20-1/2" x 13-1/2", or our smaller seat, 16-1/2" x 13-1/2".

cherry \$650

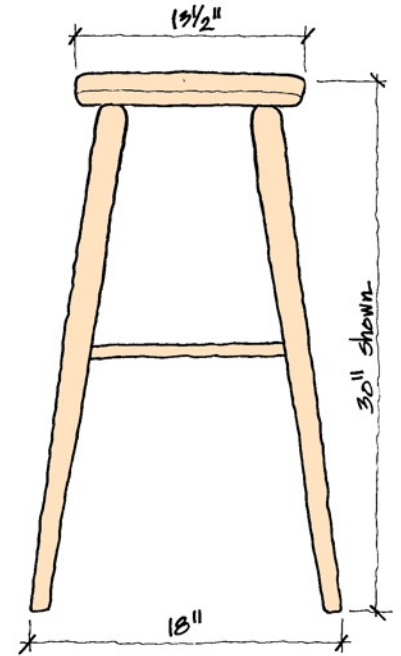

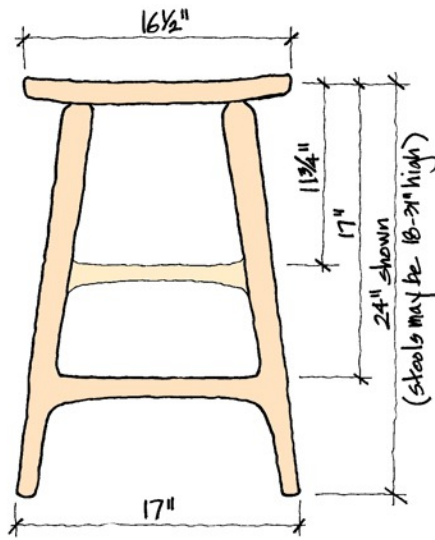

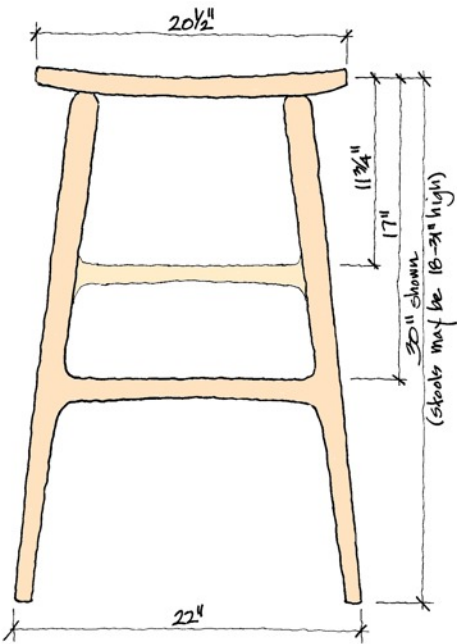

walnut \$675

maple \$675
